

UNIQUE FEATURES OF THE TRIOMATIC

TRIOMATIC FEEDING ROBOTS

Hanging or wheeled robot

You can choose from a suspended feeding robot, a wheeled robot powered by electricity, or a battery-powered wheeled robot, depending on your barn and farm operation. In addition, four types of feed kitchens are available, offering different feed storage options (loose, in blocks or bales), so the system can always be configured to suit your situation.

CHOICE OF FOUR DIFFERENT FEEDING ROBOTS:

1. Triomatic HP 2 300 "Hanging", suspended from a steel rail and powered via a conductor rail
2. Triomatic WP 2 300 / 600 "Wheeled", on wheels and powered via a conductor rail
3. Triomatic WB 2 300 "Wheeled", on wheels and battery-powered

The feeding robots have two vertical mixing augers and a capacity of 3 m³ / 110 cu.ft. or 6 m³ / 220 cu.ft., and are suitable for 50 to 800 LU.
